Welcome to RegData.

We asked you how we could improve Gabriel.

You gave us lots of ideas – thanks – and we've listened.

Gabriel served us well, but we are now replacing it with a new improved platform called RegData.

RegData will make it simpler, quicker and easier for your firm to provide regulatory data to the FCA.

RegData is part of our Data Strategy which sets out how we plan to harness the power of data and advanced analytics to transform financial regulation.

Platform improvements include same log in details as Connect.

Meaning fewer usernames and passwords to remember.

Improved layouts and user journey – making it faster and easier to get where you need to go and complete a submission.

Auto saves data every 2 minutes so you don't lose it.

Smarter step-by-step form validation.

Simple and clear error messages.

More flexible technology so we can fix issues faster and continue to improve the user experience.

And don't worry, there will be no changes to the data you need to submit in Regdata.

RegData – based on your feedback.

RegData – simpler, quicker and easier to use.

RegData – coming soon to a screen near you.
